Author Index Volume 146 (2002)

Aassila, M., Large time behaviour of solutions for a nonlinear thermoelastic system 481–491
Amato, U., A. Antoniadis and **I. De Feis,** Fourier series approximation of separable models 459–479
Antoniadis, A., see **Amato, U.** 459–479

Berriochoa, E. and **A. Cachafeiro,** Differential properties for a class of Sobolev orthogonal polynomials 361–372

Cachafeiro, A., see **Berriochoa, E.** 361–372
Cakoni, F., D. Colton and **H. Haddar,** The linear sampling method for anisotropic media 285–299
Chen, X. and **J. Sun,** Global convergence of a two-parameter family of conjugate gradient methods without line search 37– 45
Colton, D., see **Cakoni, F.** 285–299
Cottis, P.G., see **Fikioris, G.** 343–360
Cui, B.T. and **Y. Liu,** Necessary and sufficient conditions for oscillation of Robin boundary problems of neutral functional parabolic equations 387–393

De Feis, I., see **Amato, U.** 459–479
Demetriou, I.C., Signs of divided differences yield least squares data fitting with constrained monotonicity or convexity 179–211
Deng, N., see **Zhong, P.** 11– 24
Didenko, V.D. and **B. Silbermann,** On stability of approximation methods for the Muskhelishvili equation 419–441

Elliott, D., see **Johnston, P.R.** 231–251

Fabijonas, B.R., Laplace's method on a computer algebra system with an application to the real valued modified Bessel functions 323–342
Fikioris, G., P.G. Cottis and **A.D. Panagopoulos,** On an integral related to biaxially anisotropic media 343–360
Fort, J.-C. and **G. Pagès,** Asymptotics of optimal quantizers for some scalar distributions 253–275

Gotoh, J.-y., see **Konno, H.** 141–154

Haddar, H., see **Cakoni, F.** 285–299
Han, J., see **Sun, W.** 89– 98

He, Y. and **K. Li,** Stability of Galerkin and Inertial Algorithms with variable time step size 213–230
Hu, C.-F., Generalized variational inequalities with fuzzy relation 47– 56

Inuiguchi, M., see **Yamada, S.** 57– 75
Ishii, H., see **Noguchi, H.** 155–166

Jaroš, J., T. Kusano and **N. Yoshida,** Oscillation properties of solutions of a class of nonlinear parabolic equations 277–284
Jiang, J.C. and **X.H. Tang,** Oscillation of nonlinear delay difference equations 395–404
Johnston, P.R. and **D. Elliott,** Transformations for evaluating singular boundary element integrals 231–251

Kazantzis, N., On the existence and uniqueness of locally analytic invertible solutions of a system of nonlinear functional equations 301–308
Konno, H., J.-y. Gotoh, T. Uno and **A. Yuki,** A cutting plane algorithm for semi-definite programming problems with applications to failure discriminant analysis 141–154
Kusano, T., see **Jaroš, J.** 277–284

Lai, H.C. and **J.C. Lee,** On duality theorems for a nondifferentiable minimax fractional programming 115–126
Lee, J.C., see **Lai, H.C.** 115–126
Leephakpreeda, T., Novel determination of differential-equation solutions: universal approximation method 443–457
Li, D.H., see **Tong, X.** 1– 10
Li, J., see **Xu, J.** 99–113
Li, K., see **He, Y.** 213–230
Liu, G.S. and **J.Z. Zhang,** A new branch and bound algorithm for solving quadratic programs with linear complementarity constraints 77– 87
Liu, Y., see **Cui, B.T.** 387–393

Noguchi, H., M. Ogawa and **H. Ishii,** The appropriate total ranking method using DEA for multiple categorized purposes 155–166

Ogawa, M., see **Noguchi, H.** 155–166

PII: S0377-0427(02)00652-0

Pagès, G., see **Fort, J.-C.** 253–275
Palamides, P.K., Monotone positive solutions for singular boundary value problems 405–418
Panagopoulos, A.D., see **Fikioris, G.** 343–360

Qi, L., see **Tong, X.** 1– 10

Rui, H., Symmetric modified finite volume element methods for self-adjoint elliptic and parabolic problems 373–386

Silbermann, B., see **Didenko, V.D.** 419–441
Song, W., On generalized vector equilibrium problems 167–177
Sun, J., see **Chen, X.** 37– 45
Sun, J., see **Sun, W.** 89– 98
Sun, W., J. Han and **J. Sun**, Global convergence of nonmonotone descent methods for unconstrained optimization problems 89– 98

Tang, X.H., see **Jiang, J.C.** 395–404
Tanino, T., see **Yamada, S.** 57– 75
Teo, K.L., see **Yang, X.M.** 25– 36
Tong, X., D.H. Li and **L. Qi**, An iterative method for solving semismooth equations 1– 10

Uno, T., see **Konno, H.** 141–154

Xu, J. and **J. Li**, A class of stochastic optimization problems with one quadratic & several linear objective functions and extended portfolio selection model 99–113

Yamada, S., T. Tanino and **M. Inuiguchi**, An inner approximation method incorporating with a penalty function method for a reverse convex programming problem 57– 75
Yang, X.M., X.Q. Yang and **K.L. Teo**, Explicitly *B*-preinvex functions 25– 36
Yang, X.Q., see **Yang, X.M.** 25– 36
Yoshida, N., see **Jaroš, J.** 277–284
Yuki, A., see **Konno, H.** 141–154

Zeng, J.-P. and **S.Z. Zhou**, A domain decomposition method for a kind of optimization problems 127–139
Zhang, J.Z., see **Liu, G.S.** 77– 87
Zhong, P. and **N. Deng**, On a one-dimensional optimization problem derived from the efficiency analysis of Newton-PCG-like algorithms 11– 24
Zhou, S.Z., see **Zeng, J.-P.** 127–139
Zou, X., Delay induced traveling wave fronts in reaction diffusion equations of KPP-Fisher type 309–321
